

Scenario:

You are an accountant at the Bank of America and a photographer on the side. After you get off from work you want to check the upcoming weather to take pictures in different spots. You want an hourly update to prevent you being caught in the rain while taking pictures. After a few hours, you decide to make your final stop behind the Bank of America at a unique railroad.

Task 1: Checking the upcoming weather for the rest of the day.

Task 2: Go to settings to set an hourly update for the rest of the day.

Task 3: Change your location inside the weather update app.

Changes:

1. Have the weather radar easier to access from the homescreen.
2. Include the settings screen in order to set hourly updates.
3. Include the settings screen in order to change location.

Keep-the-Sames

1. The look and feel of the homescreen.
2. The settings screen includes everything and should stay the same.
3. The radar screen was a nice touch.
